AKAMOKU UDON

SOBA

Hiroshi's premium akamoku udon is sourced from the Miyagi prefecture, made only in Japan.

Akamoku is in the same family tree as the more familiar konbu or wakame, it is a type of "super seaweed" that contains an abundance of extra nutrients and minerals, that is beneficial towards one's skin and health.

Compared to soba, the akamoku udon carries more flavor and a more dynamic texture.

宏選用的頂級銅藻烏冬來自宮城縣，由日本製造及直送。

銅藻屬於與較熟悉的昆布或裙帶菜同一家族，是一種“超級海藻”，富含大量額外的營養素和礦物質，對皮膚和健康非常有益。

與蕎麥麵相比，銅藻烏冬的味道更濃郁，口感更具層次感。
